Iron and Steel Engineer Index for 1980

LIST OF AUTHORS

A

ALTON, D. E. (Kaiser Engineers) and J. R. TUREK (McLouth Steel)—"New technology for blast furnace gas cleaning water recirculation system," June, p 61
AZAMBUJA VILLANOVA, R. de (Acos Finos Piratini S/A) and D. F. SERMIN (Applied Research Laboratories S/A)—"Installation of an automatic x-ray spectrochemical laboratory," March, p 37

B

BACKMAN, J., J. SKOGBERG (SKF Steel) and H. GEDIN (Morgardshammar AB)—"SKF Steel's bar mill at Hallefors—A new tool for bar production," May, p 45
BAGGLEY, G. W., J. M. TAYLOR (J&L Steel) and T. L. ELLISON (Air Products and Chemicals)—"Development and use of a blended atmosphere gas for Aliquippa's pusher tray furnace," Nov., p 51
BAKER, G. L., W. A. CLARK, JR., J. C. STOUCH and M. A. PELLEGRINO (Bethlehem Steel)—"An effective computer-assisted planning tool for steel companies," Sept., p 31
BALLA, D. M., R. J. REINBOLD and D. W. KERN (Bethlehem Steel)—"Experience using sensor lance on BOF's at Bethlehem Steel," March, p 31
BEESE, J. G. (University of Wales Institute of Science and Technology)—"Some problem areas in the rolling of hot steel slabs," Aug., p 49
BELCHER, D. W. and E. L. BIEDELL (Stork Bowen Engineering)—"New gas cleaning system combines wet and dry processes," June, p 78
BELTRAN, M. R., I. RAIGORODSKY and H. S. SURATI (Beltran Associates)—"Tubular electrostatic precipitators of 2-stage design," Dec., p 32
BERGER, D. M. (Gilbert/Commonwealth)—"How corrosion theory relates to protective coatings," Aug., p 65
BERGSTRAND, K. G. and P. NILSSON (Bergstrand Kvalitetskontroll)—"Hot surface inspection by a new eddy-current technique," Jan., p 59
BEWLEY, J. G. (Metallurgical Industries)—"Plasma wearsurfacing extends mill roll life," Nov., p 78
BIEDELL, E. L. and D. W. BELCHER (Stork Bowen Engineering)—"New gas cleaning system combines wet and dry processes," June, p 78
BLEKKENHORST, F., J. H. BRANDENBURG and C. S. M. STOLWIJK (Hoogovens IJmuiden BV)—"Stress corrosion cracking in hot blast stoves at Hoogovens IJmuiden," March, p 55
BOTTOMLEY, W. J., M. J. NUTT and V. KUMAR (Gilmore Steel)—"Scandinavian Lancers ladle injection system—Oregon Steel Mills start-up," Oct., p 36
BOUBEL, D., P. RATTE, B. FAZAN (IRSID), J. BOUVARD (USINOR) and F. WEBER (Dillinger Huttenwerke)—"Optimum computer control of a plate mill," Nov., p 58
BOUVARD, J. (USINOR), F. WEBER (Dillinger Huttenwerke), B. FAZAN, D. BOUBEL and P. RATTE (IRSID)—"Optimum computer control of a plate mill," Nov., p 58
BRANDENBURG, J. H., C. S. M. STOLWIJK and F. BLEKKENHORST (Hoogovens IJmuiden BV)—"Stress corrosion cracking in hot blast stoves at Hoogovens IJmuiden," March, p 55
BRAUN, E. (Arus-Ruthner of America)—"How to improve pickling of stainless steel strip," April, p 79
BRIDGEWATER, H. L. and M. PERCH (Koppers)—"Heat measurement of coking coals," July, p 47
BROWN, C. M. and R. W. ENGELBERT (Republic Steel)—"Control of secondary emissions from basic oxygen steelmaking furnaces," June, p 39

C

CARPANETO, T., G. FACCO (Italimpianti of America) and A. RICCI (Societa Nazionale Cogne)—"Two years of operation of a walking beam furnace reheating continuously cast high-quality blooms," Sept., p 25
CELADA S., J., R. QUINTERO and M. QUIROGA (HYLSA)—"Use of HYL sponge iron in the blast furnace," Jan., p 37
CHACARTEGUI, J. D. (Tubacex) and K. STAAT (Friedrich Kocks)—"Tube production," April, p 39
CLARK, JR., W. A., J. C. STOUCH, M. A. PELLEGRINO and G. L. BAKER (Bethlehem Steel)—"An effective computer-assisted planning tool for steel companies," Sept., p 31
COLLIN, P. H. (Stora Kopparbergs Bergslags AB) and H. STICKLER (ASEA AB)—"ELRED—A new process for the less expensive production of liquid iron," March, p 43
CONE, C. (Thermo Electron)—"Energy management in reheat furnaces," Feb., p 52
CONNERS, A. and J. MULLEN (Pennsylvania Engineering)—"Developments in coke-oven emission control," June, p 33
CORVER, DR. H. A. (Cyanamid Canada) and DR. W. GMOHLING (SKW Trostberg AG)—"Hot metal desulfurization—N. American experience with CaD," May, p 53
CRONERT, W. (Martin & Pagenstecher), F. LOBEMEIER and G. ROBUSCH (Thyssen)—"Experience gained in stress corrosion cracking of hot blast stoves," April, p 48

D

DACKER, C.-A. (Svenskt Stal AB), S. KOLLBERG (ASEA AB) and J. LIPTON (Concast AG)—"Experience with electromagnetic stirring at SSAB, Oxelosund, slab caster," Oct., p 66
DELISIO, A. J. (Babcock Contractors) and A. S. ODASSO (Allegheny Ludlum Steel)—"Air pollution abatement at the Brackenridge works of Allegheny Ludlum Steel Corp.," June, p 51
DEPLANO, S. (Italimpianti)—"Walking beam billet reheating furnaces," July, p 33
DOBINA, D. V., G. D. RIES and J. M. HASER (Republic Steel)—"A solution to problems in mill roll salvage by welding," Aug., p 44

E

EIBE, W. W. (Blaw-Knox Foundry & Mill Machinery)—"Rapid work roll changing—Past, present and future," Sept., p 39
ELLIOTT, J. R. and R. L. PEMBERTON (Republic Steel)—"Silicon line '77," Nov., p 43
ELLISON, T. L. (Air Products and Chemicals), J. M. TAYLOR and G. W. BAGGLEY (J&L Steel)—"Development and use of a blended atmosphere gas for Aliquippa's pusher tray furnace," Nov., p 51
ENGELBERT, R. W. and C. M. BROWN (Republic Steel)—"Control of secondary emissions from basic oxygen steelmaking furnaces," June, p 39

F

FACCO, G., T. CARPANETO (Italimpianti of America) and A. RICCI (Societa Nazionale Cogne)—"Two years of operation of a walking beam furnace reheating continuously cast high-quality blooms," Sept., p 25
FAZAN, B., D. BOUBEL, P. RATTE (IRSID), J. BOUVARD (USINOR) and F. WEBER (Dillinger Huttenwerke)—"Optimum computer control of a plate mill," Nov., p 58
FELDMANN, DR. U. and DR. C. M. VLAD (Stahlwerke Peine-Salzgitter)—"Controlled cooling of wire surface from the rolling heat," Jan., p 62
FERGUSON, C. C. (Algoma)—"Tar burning on boilers at Algoma," July, p 29
FORNADLEY, R. J.—"Granite City: Bold modernization of an integrated steel plant," Aug., p SL-67
FUJII, Y., M. KOWAKA, K. YAMANAKA and S. NAGATA (Sumitomo Metal Industries)—"Stress corrosion cracking of carbon steel for hot blast stoves," May, p 25
FUKUDA, K., Y. KUBO, H. NASHIWA and K. OZAKI (Sumitomo Metal Industries)—"Energy savings at soaking pits of Wakayama works," July, p 39
FUKUOKA, Y., H. ISHIOKA, S. OSAKA, N. TANAKA and K. MATSUDO (Nippon Kokan)—"Continuous annealing and finishing line at Fukuyama works," Nov. p 67

G

GANN, G. E. (McLouth Steel)—"Steel and the marketplace," Sept., p 46
GEDIN, H. (Morgardshammar AB), J. BACKMAN and J. SKOGBERG (SKF Steel)—"SKF Steel's bar mill at Hallefors—A new tool for bar production," May, p 45
GMOHLING, DR. W. (SKW Trostberg AG) and DR. H. A. CORVER (Cyanamid Canada)—"Hot metal desulfurization—N. American experience with CaD," May, p 53
GRANDY, P. J. and R. M. VISOKEY (J&L Steel)—"J&L Steel's Pittsburgh works electric furnace shop," Oct., p 25
GROTEFEND, B. R. (Calgon)—"Applying cooling water technology to improve steel mill operations," June, p 46

H

HARLEY, I. R. (Bethlehem Steel) and G. J. POTOCHNEY (General Electric)—"Electric power system design concepts for a new large steel plant," Aug., p 25
HASER, J. M., D. V. DOBINA and G. D. RIES (Republic Steel)—"A solution to problems in mill roll salvage by welding," Aug., p 44
HAYASHI, C., T. KIKUCHI, Y. OHASHI, I. YAMAZAKI, K. NISHIMOTO and N. HIRAOKA (Sumitomo Metal Industries)—"Computer control of a continuous butt-weld pipe mill at Kashima Steel works," Aug., p 37
HAYASHI, C., Y. MURAOKA, H. KAZASHI and T. KUDO (Sumitomo Metal Industries)—"Billet mill conversion for rolling tube rounds using gothic passes," Sept., p 36
HAYCOCK, W. F. and G. W. THOM (Stelco)—"Stelco's experience with stave cooling and philosophy for future application," March, p 25
HENRYSON, L., K.-E. OBERG (Scandinavian Lancers) and F. J. WEISS (Drawo)—"Application of the Lancers injection system to existing meltshops," Feb., p 41
HIRAOKA, N., C. HAYASHI, T. KIKUCHI, Y. OHASHI, I. YAMAZAKI and K. NISHIMOTO (Sumitomo Metal Industries)—"Computer control of a continuous butt-weld pipe mill at Kashima Steel works," Aug., p 37
HOLIDAY, H. (Armco)—"Laughing at the luddites—Some hope for engineers," Sept., p 79

I

IMOTO, T., T. YAMAGUCHI, H. NISHIDA and H. OHJI (Nippon Steel)—"Replacement of BOF plants at Yawata works," Dec., p 49
IRELAND, O. V. (Armco)—"Armco's one-side galvanized sheet," Nov., p 48
ISHIOKA, H., S. OSAKA, N. TANAKA, K. MATSUDO and Y. FUKUOKA (Nippon Kokan)—"Continuous annealing and finishing line at Fukuyama works," Nov., p 67
IVES, K. D. (U.S. Steel)—"Load and roll gap instrumentation in continuous caster curved racks," Jan., p 74

K

KALTEN, F. J. (Bethlehem Steel)—"Electric motor drives for blast furnace blowers," Dec., p 43
KAZASHI, H., T. KUDO, C. HAYASHI and Y. MURAOKA (Sumitomo Metal Industries)—"Billet mill conversion for rolling tube rounds using gothic passes," Sept., p 36
KELLER, DIPL. ING. P. (BBC Brown, Boveri & Co.)—"A new technique for noncontact temperature measurement of rotating rolls," May, p 42
KERN, D. W., D. M. BALLA and R. J. REINBOLD (Bethlehem Steel)—"Experience using sensor lance on BOF's at Bethlehem Steel," March, p 31
KIKUCHI, T., Y. OHASHI, I. YAMAZAKI, K. NISHIMOTO, N. HIRAOKA and C. HAYASHI (Sumitomo Metal Industries)—"Computer control of a continuous butt-weld pipe mill at Kashima Steel works," Aug., p 37
KOLLBERG, S. (ASEA AB)—"Contribution to the theory and experience of electromagnetic stirring in continuous casting," March, p 46
KOLLBERG, S. (ASEA AB), J. LIPTON (Concast AG) and C.-A. DACKER (Svenskt Stal AB)—"Experience with electromagnetic stirring at SSAB, Oxelosund, slab caster," Oct., p 66
KONCSICS, D. M. and J. S. PHIPPS (Republic Steel)—"Construction and optimization of Republic's AOD facility at Canton," Oct., p 43
KOTSCH, J. A. and C. J. LABEE—"Developments in the Iron and Steel Industry U.S. and Canada—1979," Feb., p D-1
KOWAKA, M., K. YAMANAKA, S. NAGATA and Y. FUJII (Sumitomo Metal Industries)—"Stress corrosion cracking of carbon steel for hot blast stoves," May, p 25
KUBO, Y., H. NASHIWA, K. OZAKI and K. FUKUDA (Sumitomo Metal Industries)—"Energy savings at soaking pits of Wakayama works," July, p 39
KUDO, T., C. HAYASHI, Y. MURAOKA and H. KAZASHI (Sumitomo Metal Industries)—"Billet mill conversion for rolling tube rounds using gothic passes," Sept., p 36

KUMAR, V., W. J. BOTTOMLEY and M. J. NUTT (Gilmore Steel)—"Scandinavian Lancers ladle injection system—Oregon Steel Mills start-up," Oct., p 36
KUNDIG, K. J. A. (Allplas Systems)—"Cameron Iron eliminates fumes with floating ball blankets," Dec., p 70
KUTSUWA, H., T. MURATA and E. SATO (Nippon Steel)—"Mechanism of stress corrosion cracking of hot stove shells and evaluation of preventive measures," Feb., p 60

L

LABEE, C. J. and J. A. KOTSCH—"Developments in the Iron and Steel Industry U.S. and Canada—1979," Feb., p D-1
LABEE, C. J.—"Direct reduction at Acindar," July, p 74
LABEE, C. J.—"Stelco's Lake Erie works on stream," Nov., p 76
LAIRD, W. W. (Westinghouse Electric), S. J. PALKO and R. J. MARCOUILLER (Babcock & Wilcox)—"Ambridge—A fully computerized seamless tube mill," Jan., p 69
LEPINSKI, J. A. (Allis-Chalmers)—"The ACCAR system and its application to direct reduction of iron ores," Dec., p 25
LIPTON, J. (Concast AG), C.-A. DACKER (Svenskt Stal AB) and S. KOLLBERG (ASEA AB)—"Experience with electromagnetic stirring at SSAB, Oxelosund, slab caster," Oct., p 66
LOBEMEIER, F., G. ROBUSCH (Thyssen) and W. CRONERT (Martin & Pagenstecher)—"Experience gained in stress corrosion cracking on hot blast stoves," April, p 48

M

MANCUSO, N., E. PEARSON (CF&I), I. E. WITTMANN (Dart Environmental and Services) and M. OLTHOF (Duncan, Lagnese and Associates)—"Biological treatment of coke-oven waste water including provisions for nitrification," June, p 54
MARCOUILLER, R. J., S. J. PALKO (Babcock & Wilcox) and W. W. LAIRD (Westinghouse Electric)—"Ambridge—A fully computerized seamless tube mill," Jan., p 69
MARKLEY, H. E. (Timken)—"Ready or not, here come the 1980's," July, p 81
MATSUDO, K., Y. FUKUOKA, H. ISHIOKA, S. OSAKA and N. TANAKA (Nippon Kokan)—"Continuous annealing and finishing line at Fukuyama works," Nov., p 67
MAURER, J. R. (Allegheny Ludlum Steel)—"Ferritic stainless steels fight corrosive environments," Nov., p 81
MILLS, B. (Peabody Holmes) and J. F. ZWICKY (Wilputte)—"Desulfurization of coke-oven gas by the Holmes-Stretford process," Dec., p 37
MUELLER, H. (Sidbec-Dosco) and K. NETTELBECK (Allis-Chalmers)—"Design of Sidbec's slab caster," Oct., p 58
MUELLER, J. H. (Regenerative Environmental Equipment)—"Energy savings of heat recovery equipment," June, p 64
MULLEN, J. and A. CONNERS (Pennsylvania Engineering)—"Developments in coke-oven emission control," June, p 33
MURAOKA, Y., H. KAZASHI, T. KUDO and C. HAYASHI (Sumitomo Metal Industries)—"Billet mill conversion for rolling tube rounds using gothic passes," Sept., p 36
MURATA, T., E. SATO and H. KUTSUWA (Nippon Steel)—"Mechanism of stress corrosion cracking of hot stove shells and evaluation of preventive measures," Feb., p 60
MUSTO, D. (Advanced Technology Systems)—"Design principles and applications of a laser bar gage," July, p 43

N

NAGATA, S., Y. FUJII, M. KOWAKA and K. YAMANAKA (Sumitomo Metal Industries)—"Stress corrosion cracking of carbon steel for hot blast stoves," May, p 25
NASHIWA, H., K. OZAKI, K. FUKUDA and Y. KUBO (Sumitomo Metal Industries)—"Energy savings at soaking pits of Wakayama works," July, p 39
NATALIZIO, A. and DR. C. TWIGGE-MOLECEY (Hatch Associates)—"Ventilation of mill buildings—New directions," July, p 51
NETTELBECK, K. (Allis-Chalmers) and H. MUELLER (Sidbec-Dosco)—"Design of Sidbec's slab caster," Oct., p 58
NILSSON, P. and K. G. BERGSTRAND (Bergstrand Kvalitetskontroll)—"Hot surface inspection by a new eddy-current technique," Jan., p 59
NISHIDA, H., M. OHJI, T. IMOTO and T. YAMAGUCHI (Nippon Steel)—"Replacement of BOF plants at Yawata works," Dec., p 49
NISHIMOTO, K., N. HIRAOKA, C. HAYASHI, T. KIKUCHI, Y. OHASHI and I. YAMAZAKI (Sumitomo Metal Industries)—"Computer control of a continuous butt-weld pipe mill at Kashima Steel works," Aug., p 37
NUTT, M. J., V. KUMAR and W. J. BOTTOMLEY (Gilmore Steel)—"Scandinavian Lancers ladle injection system—Oregon Steel Mills start-up," Oct., p 36

O

OBERG, K.-E., L. HENRYSON (Scandinavian Lancers) and F. J. WEISS (Dravo)—"Application of the Lancers injection system to existing meltshops," Feb., p 41
O'CONNELL, D. and T. N. THORLA (Inland Steel)—"Modernizing a hot strip finishing mill main drive control at Inland Steel," May, p 34
ODASSO, A. S. (Allegheny Ludlum Steel) and A. J. DELISIO (Babcock Contractors)—"Air pollution abatement at the Brackenridge works of Allegheny Ludlum Steel Corp.," June, p 51
OHASHI, Y., I. YAMAZAKI, K. NISHIMOTO, N. HIRAOKA, C. HAYASHI and T. KIKUCHI (Sumitomo Metal Industries)—"Computer control of a continuous butt-weld pipe mill at Kashima Steel works," Aug., p 37
OHJI, M., T. IMOTO, T. YAMAGUCHI and H. NISHIDA (Nippon Steel)—"Replacement of BOF plants at Yawata works," Dec., p 49
OLTHOF, M. (Duncan, Lagnese and Associates) E. F. PEARSON, N. MANCUSO (CF&I) and I. E. WITTMANN (Dart Environmental and Services)—"Biological treatment of coke-oven waste water including provisions for nitrification," June, p 54
OSAKA, S., N. TANAKA, K. MATSUDO, Y. FUKUOKA and H. ISHIOKA (Nippon Kokan)—"Continuous annealing and finishing line at Fukuyama works," Nov., p 67
OZAKI, K., K. FUKUDA, Y. KUBO and H. NASHIWA (Sumitomo Metal Industries)—"Energy savings at soaking pits of Wakayama works," July, p 39

P

PALKO, S. J., R. J. MARCOUILLER (Babcock & Wilcox) and W. W. LAIRD (Westinghouse Electric)—"Ambridge—A fully computerized seamless tube mill," Jan., p 69
PALMER, B. (Atlantic Steel)—"Atlantic Steel's lubrication maintenance program improves productivity," Nov., p 82
PEARSON, E. F., N. MANCUSO (CF&I), I. E. WITTMANN (Dart Environmental and Services) and M. OLTHOF (Duncan, Lagnese and Associates)—"Biological treatment of coke-oven waste water including provisions for nitrification," June, p 54
PELLEGRINO, M. A., G. L. BAKER, W. A. CLARK, JR. and J. C. STOUCH (Bethlehem Steel)—"An effective computer-assisted planning tool for steel companies," Sept., p 31
PEMBERTON, R. L. and J. R. ELLIOTT (Republic Steel)—"Silicon line '77," Nov., p 43
PERCH, M. and H. L. BRIDGEWATER (Koppers)—"Heat measurement of coking coals," July, p 47
PHIPPS, J. S. and D. M. KONCSICS (Republic Steel)—"Construction and optimization of Republic's AOD facility at Canton," Oct., p 43
POPLAWSKI, J. V. and D. A. SECCOMBE, JR. (Bethlehem Steel)—"Bethlehem's contribution to the mathematical modeling of cold rolling in tandem mills," Sept., p 47
POTOCHNEY, G. J. (General Electric) and I. R. HARLEY (Bethlehem Steel)—"Electric power system design concepts for a new large steel plant," Aug., p 25
PRICE, J. C. (General Electric)—"Temperature control for slab reheat furnaces," Sept., p 59

Q

QUINTERO, R., M. QUIROGA and J. CELADA S. (HYLSA)—"Use of HYL sponge iron in the blast furnace," Jan., p 37
QUIROGA, M., J. CELADA S. and R. QUINTERO (HYLSA)—"Use of HYL sponge iron in the blast furnace," Jan., p 37

R

RAIGORODSKY, I., H. S. SURATI and M. R. BELTRAN (Beltran Associates)—"Tubular electrostatic precipitators of 2-stage design," Dec., p 32
RASMUSSEN, K. E. (Selas Corp. of America)—"Induction preheat of tube upsets for oil country tubular goods," Dec., p 60
RATTE, P., B. FAZAN, D. BOUBEL (IRSID), J. BOUVARD (USINOR) and F. WEBER (Dillinger Huttenwerke)—"Optimum computer control of a plate mill," Nov., p 58
REHDER, J. E. (Metkem Processes)—"Hot metal from ore and coal fines," May, p 31
REINBOLD, R. J., D. W. KERN and D. M. BALLA (Bethlehem Steel)—"Experience using sensor lance on BOF's at Bethlehem Steel," March, p 31
RICCI, A. (Societa Nazionale Cogne), G. FACCO and T. CARPANETO (Italimpianti of America)—"Two years of operation of a walking beam furnace reheating continuously cast high-quality blooms," Sept., p 25
RIES, G. D., J. M. HASER and D. V. DOBINA (Republic Steel)—"A solution to problems in mill roll salvage by welding," Aug., p 44
ROBUSCH, G., F. LOBEMEIER (Thyssen) and W. CRONERT (Martin & Pagenstecher)—"Experience gained in stress corrosion cracking on hot blast stoves," April, p 48
RUSH, R. E. (Bethlehem Steel)—"Fire-resistant fluids in basic steelmaking—which one?," Dec., p 54

S

SALAT, S. J. and A. T. WECHSLER (Treadwell)—"Planning a hot metal desulfurization facility," Oct., p 53
SAMWAYS, N. L.—"Fairless works faces the 1980's—A look at the plant today," April, p F-1
SAMWAYS, N. L.—"No. 7 blast furnace completes Inland's $1 billion expansion," Dec., p 64
SANKARAN, S. (Kaiser Aluminum and Chemical)—"Determination of liquid volumes poured from tilting vessels," Oct., p 46
SATO, E., H. KUTSUWA and T. MURATA (Nippon Steel)—"Mechanism of stress corrosion cracking of hot stove shells and evaluation of preventive measures," Feb., p 60
SCHLATTER, DIPL. ING. H. G. (BBC Brown, Boveri & Co.)—"Microcomputer-assisted control system for continuous rolling mills," May, p 63
SECCOMBE, JR., D. A. and J. V. POPLAWSKI (Bethlehem Steel)—"Bethlehem's contribution to the mathematical modeling of cold rolling in tandem mills," Sept., p 47
SENDZIMIR, M. G. (T. Sendzimir, Inc.)—"Cold mills for stainless steel," Nov., p 29
SERMIN, D. F. (Applied Research Laboratories S/A) and R. de AZAMBUJA VILLANOVA (Acos Finos Piratini S/A)—"Installation of an automatic x-ray spectrochemical laboratory," March, p 37
SKOGBERG, J., J. BACKMAN (SKF Steel) and H. GEDIN (Morgardshammar AB)—"SKF Steel's bar mill at Hallefors—A new tool for bar production," May, p 45
SMITH, D. D. (Allegany Technology)—"New technology obsoletes theoretical weights," Sept., p 71
SMITH, M. O., JR. (Bethlehem Steel)—"Stress corrosion cracking in high-temperature blast furnace stoves," Aug., p 33
STAAT, K. (Friedrich Kocks) and J. D. CHACARTEGUI (Tubacex)—"Tube production," April, p 39
STICKLER, H. (ASEA AB) and P. H. COLLIN (Stora Kopparbergs Bergslags AB)—"ELRED—A new process for the less expensive production of liquid iron," March, p 43
STINSON, G. A. (National Steel)—"Challenges facing the steel industry," Aug., p SL-85
STOLWIJK, C. S. M., F. BLEKKENHORST and J. H. BRANDENBURG (Hoogovens IJmuiden BV)—"Stress corrosion cracking in hot blast stoves at Hoogovens IJmuiden," March, p 55
STOUCH, J. C., M. A. PELLEGRINO, G. L. BAKER and W. A. CLARK, JR. (Bethlehem Steel)—"An effective computer-assisted planning tool for steel companies," Sept., p 31
SURATI, H. S., M. R. BELTRAN and I. RAIGORODSKY (Beltran Associates)—"Tubular electrostatic precipitators of 2-stage design," Dec., p 32

T

TAKEBAYASHI, I. and T. YAMAMOTO (Nakayama Steel Works)—"Replacement of open hearth/ingot casting by BOF/continuous casting at Funamachi plant of Nakayama Steel Works," Oct., p 41
TANAKA, N., K. MATSUDO, Y. FUKUOKA, H. ISHIOKA and S. OSAKA (Nippon Kokan)—"Continuous annealing and finishing line at Fukuyama works," Nov., p 67
TAYLOR, J. M., G. W. BAGGLEY (J&L Steel) and T. L. ELLISON (Air Products and Chemicals)—"Development and use of a blended atmosphere gas for Aliquippa's pusher tray furnace," Nov., p 51
THOM, G. W. and W. F. HAYCOCK (Stelco)—"Stelco's experience with stave cooling and philosophy for future application," March, p 25
THOMAS, J. (American Air Filter)—"Pulse filters can be efficient on fine dusts and fume," Aug., p 61
THORLA, T. N. and D. O'CONNELL (Inland Steel)—"Modernizing a hot strip finishing mill main drive control at Inland Steel," May, p 34
TUREK, J. R. (McLouth Steel) and D. E. ALTON (Kaiser Engineers)—"New technology for blast furnace gas cleaning water recirculation system," June, p 61
TWIGGE-MOLECEY, DR. C. and A. NATALIZIO (Hatch Associates)—"Ventilation of mill buildings—New directions," July, p 51

U

ULRICH, K. H. (Krupp Industrie- und Stahlbau)—"CODIR—The Krupp process for sponge ironmaking," Dec., p 56
URBAN, DR. rer. nat. G. (Krupp Stahltechnik GmbH)—"Kursk—Europe's largest electric specialty steel plant," March, p 65

V

VISOKEY, R. M. and P. J. GRANDY (J&L Steel)—"J&L Steel's Pittsburgh works electric furnace shop," Oct., p 25
VLAD, DR. C. M. and DR. U. FELDMANN (Stahlwerke Peine-Salzgitter)—"Controlled cooling of wire surface from the rolling heat," Jan., p 62
VOGES, B. G. (Krupp-Koppers)—"Stress corrosion cracking of hot blast stoves—Experience and preventive measures," Jan., p 43

W

WEBER, F. (Dillinger Huttenwerke), B. FAZAN, D. BOUBEL, P. RATTE (IRSID) and J. BOUVARD (USINOR)—"Optimum computer control of a plate mill," Nov., p 58
WECHSLER, A. T. and S. J. SALAT (Treadwell)—"Planning a hot metal desulfurization facility," Oct., p 53
WEI, DR. M. L. (Bethlehem Steel)—"High temperature—Friend and enemy of steel," Feb., p 46
WEISS, F. J. (Dravo), L. HENRYSON and K.-E. OBERG (Scandinavian Lancers)—"Application of the Lancers injection system to existing meltshops," Feb., p 41
WILLIAMS, T. J. (Purdue University)—"Hierarchical and distributed control systems for steel mill applications," April, p 33
WITTMANN, I. E. (Dart Environmental and Services), M. OLTHOF (Duncan, Lagnese and Associates), E. F. PEARSON and N. MANCUSO (CF&I)—"Biological treatment of coke-oven waste water including provisions for nitrification," June, p 54

Y

YAMAGUCHI, T., H. NISHIDA, M. OHJI and T. IMOTO (Nippon Steel)—"Replacement of BOF plants at Yawata works," Dec., p 49
YAMAMOTO, T. and I. TAKEBAYASHI (Nakayama Steel Works)—"Replacement of open hearth/ingot casting by BOF/continuous casting at Funamachi plant of Nakayama Steel Works," Oct., p 41
YAMANAKA, K., S. NAGATA, Y. FUJII and M. KOWAKA (Sumitomo Metal Industries)—"Stress corrosion cracking of carbon steel for hot blast stoves," May, p 25
YAMAZAKI, I., K. NISHIMOTO, N. HIRAOKA, C. HAYASHI, T. KIKUCHI and Y. OHASHI (Sumitomo Metal Industries)—"Computer control of a continuous butt-weld pipe mill at Kashima Steel works," Aug., p 37
YOUNG, J. W. (Armco)—"Evaluation of sheet steel cold rolling lubricants," Aug., p 53

Z

ZUURBIER, G. W. (Bethlehem Steel)—"Lessons from structural failures," Jan., p 49
ZWICKY, J. F. (Wilputte) and B. MILLS (Peabody Holmes)—"Desulfurization of coke-oven gas by the Holmes-Stretford process," Dec., p 37

LIST OF SUBJECTS

A

"A. B. Glossbrenner Elected 1981 AISE President," Oct., p 89
"A major obstacle to effective operation," July, p 78
"A new technique for noncontact temperature measurement of rotating rolls"—DIPL. ING. P. KELLER (BBC Brown, Boveri & Co.), May, p 42
"A solution to problems in mill roll salvage by welding"—G. D. RIES, J. M. HASER and D. V. DOBINA (Republic Steel), Aug., p 44
